

Built Green Homes Are More Efficient Than You Thought

Using data from Seattle City Light, it was proven that Built Green certified single-family homes and townhouses perform far better than non-certified homes, and even better than energy models suggested.

Electricity Savings of Built Green Homes vs. Other Homes

Built Green homes **outperformed** the other homes and our expectations!

Average Built Green Home Yearly Electricity Savings

3-Star

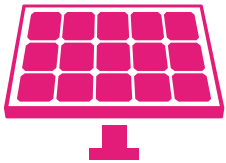

4-Star

5-Star

Annual Built Green Savings Equals

Production equivalent to **13+ solar panels**
(\$10,000+ cost)

Driving an electric
vehicle **for over**
15,000 miles

A 12W LED running
continuously for
over 44 years

Over half a ton of averted CO₂
(equivalent of carbon produced by
half an acre of forests in one year)

Built Green is the green home certification program of the
Master Builders Association of King and Snohomish Counties.
